(54) Title: **TAPE MEASURES WITH IMPACT PROTECTION**

(57) Abstract: A tape measure is disclosed which has a spooled measuring blade mounted via a rotatable connection within a casing (100). The tape measure has impact-protection components. These components may be resilient means (46, 60, 62, 82, 108) arranged between the spooled blade and the case, such as at the rotatable connection. Further impact-protection components are resilient pads (112, 114) which are moulded into impact-vulnerable locations on the outer surface of the case.
